Post	N/A
Section	N/A
Number of Interns	2

## Project Description

The Global Food Security Team is looking for a talented student in digital media editing and design who would like to work on a wide variety of projects. Tasks include:

- (1) Editing and animating of short informative videos. Students will be provided raw footage from the camera and be expected to produce clean, professional short videos with text and transitions.
- (2) Preparing original and eye catching scientific diagrams, flowcharts, and figures from provided imagery and numerical data.
- (3) Assist in preparing animated presentations.

This position has an incredible amount of room for creativity. Candidates should be self-motivated and be able to solve software issues on their own. Co-authorship in leading scientific publications is a possibility.

This project is a great way to gain visibility and job experience

## Desired Skills Interests

## Additional Information

No video editing or graphic design licenses are provided so students are encouraged to use Open Source

software.

# Language Requirements

*None*
